# HOW TO USE CUSTOMIZABLE ASSETS

1. **Click on the "Add Restaurant Name Here"** box to add your restaurant name.
   *(Note: space requirements only allow for one line of text.)*

2. **Click the area with the image icon** (🖼) to add your own photo. Select the image when prompted (PNG or JPEG).
   - *PNG or JPEG file formats are recommended for ease of use/program compatibility. TIF files may also be used if available, but are not required.*
   - *This photo area is designed to be flexible to work with photos you may already have. You do not need to be pixel perfect to use this tool, but a high resolution, horizontal image at 300 DPI will work best for printing.*

3. **Click on the "Add Details Here"** boxes to include any additional info such as Cinco de Mayo offers, specials, hours.
   *(Note: Top box allows for one line of text; bottom box allows for three lines of text.)*

4. **When you've finished** customizing details above, click "Save" to save the file locally to your desktop or preferred folder.

5. **Upload the page to your preferred print vendor** or local print shop with the size listed above in the red bar.

6. **Go back to our Cinco de Mayo landing page** to see the other assets you can use in-store or on social media.

It's that easy to plan and promote your Cinco de Mayo festivities.

*If you don't want to customize your own asset, use the last page as is.*
